

AUTO vs HINT: hint helps Uzbek directionally, not significantly

SECONDARY analysis (not the primary hypothesis) · ElevenLabs Scribe v2 · Phase 3A evaluation split · 160 paired utterances (70 Uzbek, 90 Kazakh)

SECONDARY analysis. The descriptive Uzbek HINT advantage (–8.4% relative WER, p = 0.103) should NOT be presented as a proven improvement; all bootstrap CIs include zero (overall [–0.008, 0.034]). No comparison reaches p < 0.05.
